

# Nikon SMZ1270 stereo microscope

## What is it:

A versatile stereo microscope

## Where is it:

Currently in W001, and being used for insect identifications. But its portability means it can be moved to wherever there is a need.

## What can it do:

Provides both excellent optical performance, such as high-magnification, high-zoom ratio and high-resolution images, and advanced operability. The expandability of parallel optics makes these models suitable for a wide range of applications.

## Who can use it:

ERS staff and research students, subject to availability and after appropriate training

## Who to contact:

Technician – TBA

Researcher: Dr Graham Hall, [ghall20@une.edu.au](mailto:ghall20@une.edu.au) or 6773 3179
